EU Regulation

REACH

EU Chemicals Regulations 1907/2006

Dear Customer,

As known, on 01/06/2007, the EU Regulation 1907/2006 about Registration, Evaluation, Authorization and Restriction of Chemicals came in force.

REACH concerns all industries and commits them the responsibility to supply information about chemicals security and to manage adequately their use risks.

According to REACH, producers and importers have to register chemicals and raw materials that are produced or imported in quantities greater than a ton per year, unless chemicals free of registration

Bakker Springs B.V.

declares:

That REACH does not apply to their case as any chemicals are produced or imported.

Bakker Springs B.V. will continue to check with its suppliers to ensure that this information remains updated. Should any changes to come to the attention of Bakker Springs B.V. we will inform you accordingly.

We remain at your complete disposal for any explanation about the matter.

Yours sincerely

Bakker Springs B.V.
